

"WE DO WHAT WE'RE TOLD VILLE"

Values	You've accepted a government which is run by a very strict and strong central leadership group. You're highly organized and the people of your group are assigned specific tasks by the leader. Your country strives for efficient use of time and resources, which will increase economic growth and hopefully raise the standard of living. It is up to the central leaders to determine what is needed and how the resources will be used.
Goals	To produce what the central leadership finds necessary for your society. Also, there must be an efficient use of time and resources so increased production and growth will occur.
Situation	With your limited resources of string and beads you can create either rings, necklaces or bracelets. Your group gets \$10 (dollars) for a necklace, \$5 (dollars) for each bracelet and \$2 (dollars) for each ring. Your country needs 5 rings immediately, and then the central planners want necklaces to be produced by your group.
Production Process	<ul style="list-style-type: none">> The central planners emphasize specialization. In alphabetical order by first name, roles are assigned as follows:<ul style="list-style-type: none">• Maker - draws the string for the items• Bead drawer - uses the tool to draw empty circles to represent beads (these are not placed on the string - draw them in a pile.)• Bead color filler - Fills the empty circles with color (these are not placed on the string - fill them in the pile from the Bead Drawer).• Bead stringer - Moves the color-filled beads from the pile and places on the string.• Quality control - Reviews item for quality (uniform bead size, no extra string, etc.)> Each bracelet must be made with piece of string with 8 beads on it in this sequence: 3 red, 2 aqua, and 3 green.> A ring must be made from a piece of string with 4 beads in this sequence: 1 red, 1 yellow, 1 blue, and 1 green.> A necklace is made with a piece of string and 15 beads in this sequence: 3 yellow, 3 blue, 3 green, 3 aqua and 3 red.> The finished product is then inspected by the quality control person who marks down the dollar amount. Any adjustments to the product are made by the maker.> Your group will receive \$10 (dollars) per person if the required quota is filled (5 rings). After that, the dollars earned by your production will go to the central planners and will not be added to your total dollar amount.
