

"WE WANT EVERYONE TO BE EQUAL VILLE"

Values	Your group is really concerned with the common good. You value sharing wealth and property, and you believe goods and services should be divided up according to how much a person produces. Goods and services are produced to be used, not to make a profit. The government owns your resources but the people have some say in decision making.
Goals	To promote equality among all. You want to make decisions that benefit society as a whole.
Situation	With your present limited resources of string and beads you can create rings, necklaces, or bracelets. Your group gets \$10 (dollars) for each necklace, \$5 (dollars) for each bracelet and \$2 (dollars) for each ring. Your country only wants bracelets so in order to better your country as a whole you must only produce bracelets.
Production Process	<ul style="list-style-type: none">> Each person must make the entire bracelet, no specialization of tasks.> The oldest person will begin by drawing the string for their bracelet first. Once they have finished, the next oldest person can start drawing.> Each bracelet must be made with piece of string with 8 beads on it in this sequence: 3 red, 2 aqua, and 3 green.> Once finished, the bracelet should be reviewed by the quality control person who is checking for the erasing of remaining string ends, uniform size of beads, etc. Any adjustments to the bracelet must be made by the maker.> The maker then asks the quality control person for approval. The quality control person then records the \$5 (dollars) if all procedures were followed correctly. The workers will then divide the money evenly based on the total number of bracelets produced.> According to the government, you must only make 1 bracelet every 2 minutes before starting the second one. This allows the workers to have time to socialize, relax, and make sure everyone is doing okay.
